

Financial planning for life beyond sport.

Connect today's earnings to tomorrow's choices.

Your career moves fast. Plan beyond it.

- Life today
- Career changes
- Life after sport

A strong sporting income creates opportunity, but it may arrive over a short and unpredictable career. A useful plan connects your spending, savings and commitments to the life you want. KPO helps organise that picture and coordinate the specialists needed to turn intentions into actions.

WHERE TO START

- 01 Establish your baseline**
Bring together income, spending, assets, debts, pensions and existing policies. Identify upcoming tax bills and major commitments.
- 02 Define the life you want**
Set priorities for family, property, education, business and retirement. Give each goal a timeframe and an estimated cost.
- 03 Prepare for uncertainty**
Discuss cash reserves and protection with qualified advisers. Explore what changes if bonuses disappear, income falls or your career ends early.
- 04 Separate time horizons**
Distinguish money for current commitments from longer-term goals. Check access restrictions before relying on investments or pension assets.
- 05 Connect your support team**
Agree responsibilities with your agent, accountant, lawyer and regulated advisers. Keep decisions joined up across countries and contracts.
- 06 Review as life changes**
Track agreed actions and revisit your plan at key milestones: a new contract, transfer, injury, family change or retirement.

ONE PLAN, THREE TIME HORIZONS

Now: commitments & cash

Career: goals & resilience

After sport: income & purpose

Build a plan around the life you want.
