

Private markets & ventures.

Understand the opportunity. Examine the evidence.

Ask better
questions.
Build with intent.

- Learn & understand
- Organise the evidence
- Prepare the business

Athletes are often introduced to start-ups, private investments and ideas for their own businesses. KPO helps make the questions clearer, organise factual due diligence and prepare operating ventures. We separate evidence from assumptions and coordinate specialist input before you make commitments.

HOW WE SUPPORT YOU

- 01 Private-market education**

Explain illiquidity, concentration, dilution and potential loss. Private investments can tie up capital for years and may lose all their value.
- 02 Business evidence**

Organise company records, financials and customer evidence. Document gaps, untested claims and questions for management.
- 03 Terms and ownership**

Collect proposed terms and flag points for specialist review: valuation assumptions, share rights, dilution, conflicts, exit provisions and further funding.
- 04 Specialist diligence**

Coordinate legal, tax, financial and sector reviews. Bring findings and unresolved questions into one factual brief, without an investment recommendation.
- 05 Your own venture**

Help test a business concept, customer need and operating model. Build budgets, identify delivery partners and define practical launch milestones.
- 06 A structured next step**

Maintain a question log, assigned actions and review dates. Investment advice and transaction execution remain with appropriately authorised professionals.

YOUR PRACTICAL OUTPUTS

Factual diligence brief

Open-question register

Venture-readiness plan

Bring discipline to your next opportunity.
